## Serious About Powersports!

Avoid unwanted disruption to your valuable riding time.  
Only a genuine Western powersports battery gives you:

- ✓ Up to 80% more starting power per kg.\*
- ✓ Maximum performance.
- ✓ Up to 3x longer life.\*\*
- ✓ 66% less water loss and servicing.^
- ✓ Reduced self discharge.
- ✓ Superior vibration and impact resistance.
- ✓ Reduced maintenance.
- ✓ Reassurance that the battery design and process control conforms to the strictest OE manufacturers' standards.

\* Based on comparison of Western YTZ7S & YTX7L-BS batteries.

\*\* When compared to equivalent conventional type battery.

^ When compared to lead antimony type battery.

RANGE GUIDE

***If you're serious  
about powersports,  
we've got a battery***

Manufactured to the highest international standards from durable internal components and the latest engineering techniques, Western Powersports Batteries are designed to provide reliable starting power and performance when it is needed the most.

Featuring a comprehensive selection of both Maintainable and Maintenance Free VRLA (Valve Regulated Lead Acid) batteries, Western Powersports Batteries are suitable for a diverse range of applications including:

-  **MOTORCYCLES**
-  **SCOOTERS**
-  **ATV'S**
-  **WATER CRAFT**
-  **UTILITY VEHICLES**

With a complete line of powersports batteries that from the high performance maintenance free battery range that comes factory-charged and ready to install, to the conventional line of flooded products, Western Electrical has the full power solution to satisfy the exactly what enthusiasts really want:

- **Maximum Starting Power**
- **Longer Life**
- **Superior Performance**
- **Reliability.**

***Only genuine Western powersports  
batteries utilise the finest raw materials  
and state-of-the-art manufacturing  
processes approved by the world's  
leading vehicle manufacturers.***

### ***A Proven Track Record***

The world's leading race teams fit and use Western batteries in their powersports machines.

-The Power Behind and Beyond!***

### **Sealed Activated MF AGM**

No measuring, pouring or initial charge required, Western Sealed Activated MF AGM battery range is perfect for people with better things to do than battery maintenance. This compact, rugged, lightweight VRLA battery is the ultimate in powersports battery technology and the preferred choice for today's high performance power sports vehicles.

- Up to 80% more starting power per kg.\*
- Maintenance free.
- Spill proof design for multi angle ftment.
- Superior vibration resistance.
- Reduced self discharge for longer battery life.
- Factory activated – filled sealed and charged at the factory.

### **Maintenance Free VRLA**

Featuring the latest in battery design and technology, the MF VRLA battery range deliver superior starting power, require no-ongoing maintenance and provide exceptional vibration and impact resistance. Once activated these batteries do not require refilling and remain maintenancefree for the life of the battery.

- advanced lead calcium technology maximises starting power.
- Lasts up to 3 times longer.\*\*
- Holds charge for longer.
- Spill-proof design.
- Sulphation retardant reduces battery plate sulphation.

### **Conventional High Performance**

A range of batteries designed to meet the special demands of more complex machines. Specialist separators, robust internal materials and a power boosting design, ensures increased power, reduced maintenance and longer life.

- 30% more cranking power.\*\*
- Sulphate Stop helps curb plate sulphation for longer life.
- 66% less water loss and servicing.^
- Low Maintenance.
- Reduced self discharge for longer times between charging.

### **Conventional**

A range of batteries incorporate durable internal components and special design features to deliver dependable starting power, superior vibration resistance and maximum life.

- Patented separators for high cranking power.
- Through-partition construction delivers maximum power.
- Unique sealed posts resist corrosion for longer battery life.
- Heat sealed, bonded unit and container resists damage from fuel, oil and impact.
